

Dear Colleagues,

We would like to invite you to respond to a survey regarding your experiences with research and innovation.

This global survey forms a part of the EU Horizon 2020 ‘Responsible Research and Innovation Networking Globally’ ([RRING](#)) project. Our surveys will be gathering insights into research and innovation practices, specifically including various behaviors related to responsible research and innovation, as well as your views on the UN’s Sustainable Development Goals. Therefore we are really eager to learn from your insights concerning how research and innovation are being pursued in your country and respective field.

By participating in this survey, you will be contributing to the formation of an international approach to research and innovation, which reflects the realities of your context (geographic, social, economic, etc.). You will also be in the unique position where your ideas will be directly feeding into the setup of a new global network on responsible research and innovation, hosted by UNESCO.

Should this opportunity interest you, we would be grateful if you could complete the survey by 20 Dec 2019. We expect the survey will take about 30 minutes to complete. The survey (with further information) is available here: <https://rring.qualiaanalytics.org/?tag=VU> .

We would also be very grateful if you would forward this invitation to any of your colleagues and contacts, who you think may be interested in this survey opportunity. Essentially, we are keen to hear from an array of different research and innovation professionals, and so are eager to have as many voices represented as possible.

If you have any questions regarding this survey, please do not hesitate to contact [survey@qualiaanalytics.org](mailto:survey@qualiaanalytics.org); if you have any inquiries regarding the overall project, please do not hesitate to contact [rring.eu@gmail.com](mailto:rring.eu@gmail.com).
